This 4848 pallet set the gold standard for heavy industrial use over 40 years ago. Originally designed for use in major industries for the safe storage of hazardous waste materials, acids, caustics, solvents, oils and sludge; this pallet is legendary for its rugged durability.

Nestable, washable, recyclable and reusable for unlimited trips. The super durable 4848 is a proven winner, built like a Sherman Tank to withstand the toughest shipping conditions.

- Used by the automotive industry for the safe storage of 55-gallon drums of oils, paints, sealers, solvents and degreasing chemicals in their red label rooms and general stores since 1976
- Used by the nuclear metals industry for the storage of depleted uranium
- Can be steam cleaned, solvent cleaned and decontaminated for continued long usage
- Designed for lift truck with 5" wide and 40" long minimum fork size and hand jacks with a minimum 20" space between forks
- Fork entry is designed so that blades are always on the center of gravity or slightly outboard of drum center, providing excellent stability
- Pallets with drums can be stacked 3 high, 25 pallets nested are approximately 84" high
- 600 Plastic 48 x 48 Drum Pallets, weight 45,000 lbs, can be shipped in a 102" wide body trailer, National Motor Freight Class, item 150383, pallets for lift trucks, plastic other than cellular or foam plastic
